Series
Endmill**

Unique Geometry Improves Chip Evacuation

Great for Aerospace Materials,
High Temperature Alloys
and Titanium!

C-Series

Better Edge's New C series endmill uses a unique helix angle geometry improving chip evacuation for better overall performance. Using a PVD Sputtering process this endmill has a new smooth proprietary Coating. Let us prove we can beat the competition by calling 1-866-887-5546 for your free test tool today!

WHY CHOOSE US

Our experienced Engineering staff is committed to quality, and can recommend Speeds and Feeds for your application. See our website for videos of this Endmill performing!

OUR SERVICES

- ✓ New Endmills and Drills
- ✓ Coating
- ✓ Specials
- ✓ Reconditioning Services
